The first step for a new ladder is to configure the properties of the ladder.

This is the starting page for administration of your ladder. From this page, you can add more players, configure the ladder, or go to one of up to any four pre-configured ladders.

The label is applied to each of four different ladders to identify the particular ladder to the players. It is normally used to divide the ladder up into skill levels. You may use any label that is appropriate for your ladder divisions. It is not necessary to have 4 separate divisions. You may have just have 1 or 2 divisions and leave the others blank. Examples:

A, B, C, Novice

4.5, 4.0.,3.5, 3.0

This is the person with the overall responsibility for operation of the ladder. It may or may not be the same as one of the Ladder Captains.

This value is the number of points per game used to calculate the total number of points possible for the player for the week. The percentage
Changing this number will affect the percent calculation for existing scores. It is best to set this value when starting a new ladder.

Maximum Movement:

The maximum movement of a player in the rankings, up or down, from week to week is limited by the program to a maximum of 1/4 of the
bottom of the ladder to the top or vice versa because of a single exceptional score. Enter a number in the box to override the default value of
greater than the size of the ladder to prevent any restriction in the movement. Example: Entering 4 in the box would limit movement of a play
different than 4 if other players are also moving up or down.

Ladder Manager:

This is the person with the overall responsibility for operation of the ladder. It may or may not be the same as one of the Ladder Captains.

Label:

Select a ladder manager and a captain for each ladder division. Each ladder division can have a separate ladder captain if desired, or one person can manage everything.

The final step of the configuration is to select the Day and Time for each ladder. Use the first 3 letters for the day of the week on which the ladder is played. This must be the exact abbreviation of the day because it is used by the computer to calculate the next play date. Time can be any format (limit 8 characters). This is the time that will be published on the schedule for each ladder. Example: 7:00 pm

These are links to the ladder standings page for each ladder. The standings page is the page where scores are recorded and schedules are created.

Inactive players appear in a separate list under the active list.

Byes are tallied automatically, but may be edited manually if desired.

Scores and weekly rankings are not normally entered on this form, but may be manually edited if an incorrect score was entered.

This is the standings page that keeps track of the players and results. There is a separate form for each of up to 4 ladder divisions. There is no limit to the number of players.

These columns, outlined in green, contain the scores for the most recent 10 weeks. W10 is the most recent week appearing next to the data input column.

This column, outlined in red, is where all of the data goes. It is used to record the weekly scores or to assign courts for the weekly schedule.

When the "Publish Schedule" button is clicked, the players are grouped in multiples of 4. Any extra players should have a bye that week and should be available as a sub in case of late cancellations.

This is an example of a completed standings page published to the website. The most recent scores are on the right in week 10. Players will appear in the order of the percentage shown in the right-hand column unless there is an "R" beside the percentage number. That indicates that movement was restricted to one fourth of the size of the ladder to minimize the yo-yo effect of exceptionally high or low scores.
